RE: Vollmer Custom Pools / Eco Pool Finish

To Whom It May Concern,

KDW worked with David Vollmer of Vollmer Custom Pools on the Typhoon Texas Waterpark Project in Katy, TX. David is a veteran of the pool industry, and I would personally like to extend my sincere recommendation for David on your future projects and also express my desire to work with him again on our future projects. He and his staff were great to have on our team from start to finish of the project.

Typhoon Texas was a unique opportunity for KDW. We had never built a waterpark before so we spent a great deal of time researching and investigating different products and equipment. Pool finish was an area the owner took special care to get right. After many months of research, all signs pointed to Eco Pool Finish. With Eco Pool Finish, we found a product that felt good to the touch and looked good at the same time. It can be used in both wet or dry applications (perfect for our beach entries and freeboard conditions.) In addition, the material was durable enough to withstand the daily rigors of a public waterpark and the thousands of guests that would be frequenting the park. On top of all that, the product came with a 10year manufacturer's warranty.

David did mocks-ups for us and allowed us to tour several pools where he had successfully installed the product prior to our selection. David did not have a lot of experience working on a commercial construction project, but quickly learned the ropes and was a team player from the word "go." Communication is key to the success of any project. David passed that test with flying colors. We will definitely work with Vollmer again in the future and recommend them to anyone looking to enhance their pool's finish.

Please feel free to contact me if you have any questions.

Sincerely,

Todd Hlavinka
Project Manager
